

New Quarantine Rules

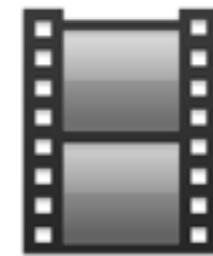

You can make a suitable quarantine plan by the requirements

OBLIGATION

- Quarantine for 14 days after arrival including required hotel stopover and self-isolation
- Two Coronavirus molecular tests
- Related costs of hotel stay

Watch the video to learn about the new obligations of Canada for travellers

TEST

Nasai swab

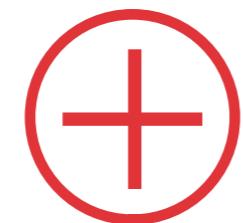

Throat swab

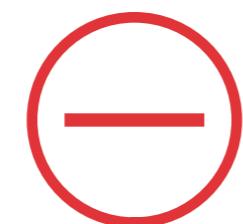

STEP I:

Follow the instructions of quarantine officers, you need to take the first COVID-19 molecular test and get the nsal swab specimen collection kit when you arrive at the airport. Then, you should remain there before the result of this test is received.

STEP II:

If the test result is negative, you can check out the government-authorized accommodation and choose the place you will quarantine, but make sure you follow public health measurements in the process of transportation.

STEP III:

When you get negative, invalid or indeterminate test result, you need to wait the further instructions that quarantine officers will help you. Also, you need to report to service Canada in the 48 hours.
